

TECHNICAL SPECIFICATION

SATIN

It is a calendered PVC film POLYMERIC satiny texture, available in eleven colors: white, yellow, orange, red, pink, blue, military green, silver, graphite, black and purple metallic. Paper liner coated siliconized and repositionable acrylic adhesive.

Indication: Designed for protection and customization of vehicles and can be used for clipping. Good stability on smooth surfaces and curves, resistant to light impacts.

Physical Property:
Front: PVC compounder 80µm (microns).
Liner: Paper coated siliconized 150 g/m².
Adhesive: acrylic repositionable 17 g/m² (\pm 2 g/m²).

Supply and Durability:

- Material packed in box and cardboard reels with width of 1,38m. For black color, there is also available in width of 1.22m.
- Expected life: five years (Exceptions: metallic colors – one year; silver and graphite – six months). In horizontal this durability is reduced to 30%. Important: the durability can be extended or decreased as a result of application techniques and conservation.

Storage: Store at temperatures between 20°C and 30°C, relative humidity between 40% and 50%. Validity: two years from the date of manufacture if packed in original packaging and in an appropriate place.

Recomendations:

- Apply in smooth superficie; cleaned with isopropyl alcohol avoiding contact with impurities, oils or any other chemical.
- Do not use in places with ripples, rough surfaces and / or porous
- Excess solvent usage reduces the durability of the product of time.
- Install immediately after cutting.
- Once applied to avoid aggressive products and constant friction.

- The above data are based on laboratory tests that Alltak believes to be reliable and are provided for informational purposes only and do not constitute any form of guarantee.
- Due to diversity of potential influencing factors during application and use of the adhesive film for special applications, we recommend customers to conduct their own testing.

NOTE: Ours products are not part of the production chain of auto parts and construction materials.

TECHNICAL SPECIFICATION

SATIN PEARL

It is a calendered PVC film POLYMERIC white pearled satin appearance available in two colors: white and pink. Paper liner coated siliconized and repositionable acrylic adhesive.

Indication: Designed for protection and customization of vehicles and can be used for clipping. Good stability on smooth surfaces and curves, resistant to light impacts.

Physical Property: Front: PVC compounder 160µm (microns).
Liner: Coated siliconized paper 150 g/m².
Adhesive: acrylic repositionable 17 g/m² (\pm 2 g/m²).

Supply and • Material packed in box and cardboard reels with a width of 1.38m.

Durability: • Expected durability: one year.
Important: the durability can be extended or decreased as a result of application techniques and conservation.

Storage: Store at temperatures between 20°C and 30°C, relative humidity between 40% and 50%.
Validity: two years from the date of manufacture if packed in original packaging and in an appropriate place.

Recommendations:

- Apply in smooth surface; cleaned with isopropyl alcohol avoiding contact with impurities, oils or any other chemical.
- Do not use in places with ripples, rough surfaces and/or porous.
